PROJECT OVERVIEW

Dataset : Amazon E-commerce Scraped Data

Data Description :

Categorical Column

1. Name
2. Main Category
3. Sub Category
4. Image
5. Link

Numerical Column

6. Ratings
7. No. of Ratings
8. Discount Price
9. Actual Price

No of Records : 551585

Steps : Cleaning, Validation, Handling missing values, Removing duplicates, Loading Data

Objective : Extract insights by providing Interactive visualizations.

Insights : Product categories, Pricing Trends, customer ratings etc.

LANGUAGES USED

1. Python

Price VS Rating Analysis

Price VS Rating Analysis

Observations :

- 1. With Respect to all the categories we can see the costly products are tend to have higher ratings.
- 2. In Grocery Category an exceptional increase in ratings to 4.8 correlates with a significant shift towards higher-priced products, reaching prices as high as 10k.
- 3. Conversely, Women's clothing is having opposite trend.

Categories: All

Total	46.16

Discount Percentage VS Category

Observation :

Fashion products like Clothing, Bags & Luggage, Accessories and Kid's fashion categories are receiving higher discount percentages, whereas basic necessities such as groceries, health, and pet supplies have relatively lower discounts.

Popular Categories Based On the Number of Products

Categories VS Number of Products

Observations :

- 1. Fashion and accessories categories have highest number of products.
- 2. As mentioned earlier, that fashion products are having higher discount percentages, which might be related to the higher product count.

Conclusion

1. Consider splitting categories like TV, Audio, Camera, and Accessories to get a more fined grouping of products.
2. Day-to-Day products such as Groceries, beauty items and clothing have affordable prices. also tend to have lower discounts.
3. We can observe a greater number of fashion products and accessories being offered at higher discounts , indicating increased competition on these categories.

Challenges Faced

1. Duplicates across subcategories
2. URL Validation and Web Scraping
3. Data Skewness
